	Do	Say	Do	Say
<i>Terrain</i>				
WHOOP, WHOOP, PULL UP TERRAIN, TERRAIN, PULL UP	Push G/A Button Push Firewall Click Disconnect A/T Click Disconnect A/P Push Spdbrks- Down Pitch - 20° up to PLI	<i>Terrain Firewall</i>	Monitor altitude Confirm: Firewall Power G/A Mode A/T disconnect A/P disconnect Speedbrakes - Down Check ADI has: Blank↓ FD G/A→ G/A↑ Say Radar Altitude & trend Do not say A/S until well clear.	<i>Recover</i> <i>1000 sinking</i> <i>1500 climbing</i>
Clear of Terrain and Climbing	Pitch - 15° Power - Straight up Flight Controls Flaps - 20... Positive Rate Gear -Up MCP - CBS,HDG&ALT A/T↓ CMD Pitch→Lateral↑	<i>Flaps - 20 Positive Rate Gear -Up CLB Thrust Bug 180 Select SPD Flaps - 5 HDG SEL Make PIREP</i>	As Requested	<i>Flaps - 20 Positive Rate CLB Thrust Bug 180 Select SPD Flaps - 5 HDG SEL Tower, Delta 123, Missed App., PIREP...</i>
	Flaps - up on schedule	<i>Center A/P On After Takeoff ✓ Make PIREP</i>		

Reactive Windshear (GPWS) is armed

- o < 1500'

Predictive Windshear is enabled

- o < 2300'

- o T/O Power

- o < or = 40 mile range

Predictive Windshear alerts are available

- o <1200'

- o T/O Power +12 seconds

Predictive Windshear

- o Caution 50 degrees wide – 0.5 miles to 3 miles

- o Warning – straight ahead – 0.5 mi to 3 mi (gnd) or 0.5 to 1.5 mi (inflight)

Predictive Windshear Inhibits

- o Caution – 80 Kts to 400'

- o Warning – 100 Kts to 50'

- o Terrain mode inhibits display of Predictive windshear on HSI

If in ALT CAP, may have to select SPD button

A/P on

Check

A/T↓ CMD

Pitch→Lateral↑

ON Windshear – may get TO – TO not G/A – G/A on some planes
